

Explanation of the 2010 ZIP Code Tabulation Area (ZCTA) to County Relationship File:

The 2010 ZIP Code Tabulation Area (ZCTA) to County Relationship File provides relationships between the 2010 ZCTAs and the 2010 county or county equivalents. Each record in the relationship file represents one polygon that is formed when the 2010 ZCTAs overlay the county or county equivalents. This file represents intersections of geography only. In situations where there is a county or county equivalent, but no ZCTA exists, the records are not included in this file. It is important to note that all population and housing unit figures given in the file are from the 2010 Census.
